DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a priming system with a substrate, classified in class 422, subclass 100.
 - II. Claims 15-19, drawn to a priming system, classified in class 422, subclass 100.
 - III. Claims 20-24, drawn to method for priming a chip, classified in class 436, subclass 180.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the adapter module such as the first interface being arranged to receive a pump mechanism, at least one channel being in fluid communication with the first interface, at least one first pressure port being positioned within a first cavity from the plurality of cavities, the adapter module is positioned over the substrate. The subcombination has separate utility such as any type of fluid transfer that can function on its own.

Art Unit: 1743

3. Inventions I,II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be used without a top unit.

4. Because these inventions are distinct for the reasons given above and the search required for Group I,II is not required for Group III, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Donald McKenna on June 14, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
